## COMPETENCES

	Frontend
	Html
	JavaScript
	CSS
	React JS
	Bootstrap
	Next.js
	Tailwind CSS
	JQuery
	Flutter
	Electrode
	CMS: Joomla, Wordpress
	Backend
Developpement web	PHP
	Java
	Python
	C#
	Spring Boot
	ASP.NET core
	PL/SQL
	Node JS
	Database management
	MongoDB
	Django
	SQLite
	SQL
	MYSQL
	PostgreSQL
	Oracle
	Workbench
	Metabase
	Version Control
	GitHub
	Cloud & DevOps
	Azure
	AWS
Android	Java
	kotlin
Data Science / Analytics	Programation
	R
	Python
	Visualization
	Matplotlib

## PROFILE

Extensive practical knowledge and highly motivated to hold a position related to data science and artificial intelligence, with a Master's in computer applications specializing in artificial intelligence. I am bilingual, fluent in both French and English. I am also interested in publishing research articles, which can be found in my publication section, and I enjoy continuously learning new technologies.

## PROFESSIONAL EXPERIENCE

**U&I Interior Design India** #2 MONTHS + FEB - MAY 2024  
Python Cum Developer Web

- Debugging and improving the old application.
- Designing an entirely new application with React.js for the customer service to estimate the project design cost.
- Collaborating with designers and all company members to develop visually appealing websites and applications to enhance the company's productivity.

**The Kectil Program USA** #1 YEAR 2023 - 2024  
Regional Coordinator ASIA 2

- An NGO for the development of certain skills in young people in developing countries, focused on leadership.
- Kectil Coordinator for the Asia 2 region in India, with the goal of training and assisting students in the Kectil program.
- Collaboration between coordinators for project proposal development.
- Invited to the conference in Atlanta, Georgia, titled State of Youth in Developing Countries in 2023.

## TRAINING & WORKSHOP

- Data analysis with Quantum on the Forage platform, focused on advanced R programming.
- Simulated Power BI with PwC on the Forage platform.
- Data Science with Teachnook.
- Data extraction and NLP with Black Coffe for sentiment analysis in texts via a given URL for 2 weeks.
- Development of an online learning website with .NET at Parul University.
- Development of a supermarket application with Electrode, where I am integrating data science.
- Introduction to Machine Learning on Kaggle.
- Development of a supermarket application with Electrode, where I am integrating data science.
- GreatLearning: Introduction to NoSQL.
- Tableau Crash Course 2021: Creating shared COVID-19 dashboards on Udemy.
- The Data Strategy Course: Building a Data-Driven Business on Udemy.
- SQL Course 2024: SQL for Data Analysis and Data Science on Udemy.

priya.swaminarayan@paruluniversity.ac.in

EDUCATIONS

Master of Computer Application - AI Parul University	2024
Bachelor of Computer Application ITM University	2022
Licence 1&2 Math-Info Nangui - Abrogoua	2019
BAC D	2016

AREA OF EXPERTISE

- **Data engineering and warehousing**  
Transform data into useful information for analysis (manage the source, structure, ensure quality, insert, and make the data accessible).
- **Data Science**  
Data mining and statistical analysis, applying statistics in data exploration and analysis, with the use of predictive models to reveal trends and patterns based on existing data.
- **Mobile, Web Development**  
Skills in responsive web design.  
Skills in SEO.  
Backend.  
Curiosity to learn quickly.  
Database administration and architecture.  
Design, maintain, and deploy large volumes of databases.
- **Database administration and architecture**  
Design, maintain, and deploy large volumes of databases.
- **BI and strategy**  
Manage data in the backend to ensure data accuracy and simplicity, and manage dashboards by reporting to stakeholders.
- **Data visualization and presentations**  
Skills in data visualization and creating clear and effective presentations.

PUBLICATION

Validation publication of my Master's degree visible on  
ResearchGate and Google Scholar under the title:  
*Computer Vision with ML/DL for Crime Data Analysis.*

The goal is to detect any criminal in a given space before they  
act, based on new technologies such as Machine Learning  
and Computer Vision.
